

Hagg Farm Site 103 Excavation Parking.

Contact: Non-SWAAG Members please email stephen@swaag.org to confirm which days you will be attending.

Subsequent pages contain all the required information on how to find the excavation site and where to park. The excavation site is about a 10 minute walk across grass fields from the car park with an ascent of approximately 45 metres or 150 feet. The excavation site is not obvious from the car park location so you must arrive at the car parking before 0915h for a 0930h start on the excavation site. If you happen to arrive first just wait by your car until a SWAAG member arrives.

This is an active sheep farm so no dogs please.

The images below show you the directions to the car park from the Grinton to Reeth road. The image of the entrance to West Hagg Farm shows a closed gate. This particular gate please leave it as you found it, open or closed, but if you see sheep in the field then make sure that the gate is closed. All other gates: please close them behind you unless it has been left wide open to allow sheep to graze multiple fields.
