Use this page at the end of each day to record a short summary of everyone on your team's thoughts about the day and the dig.

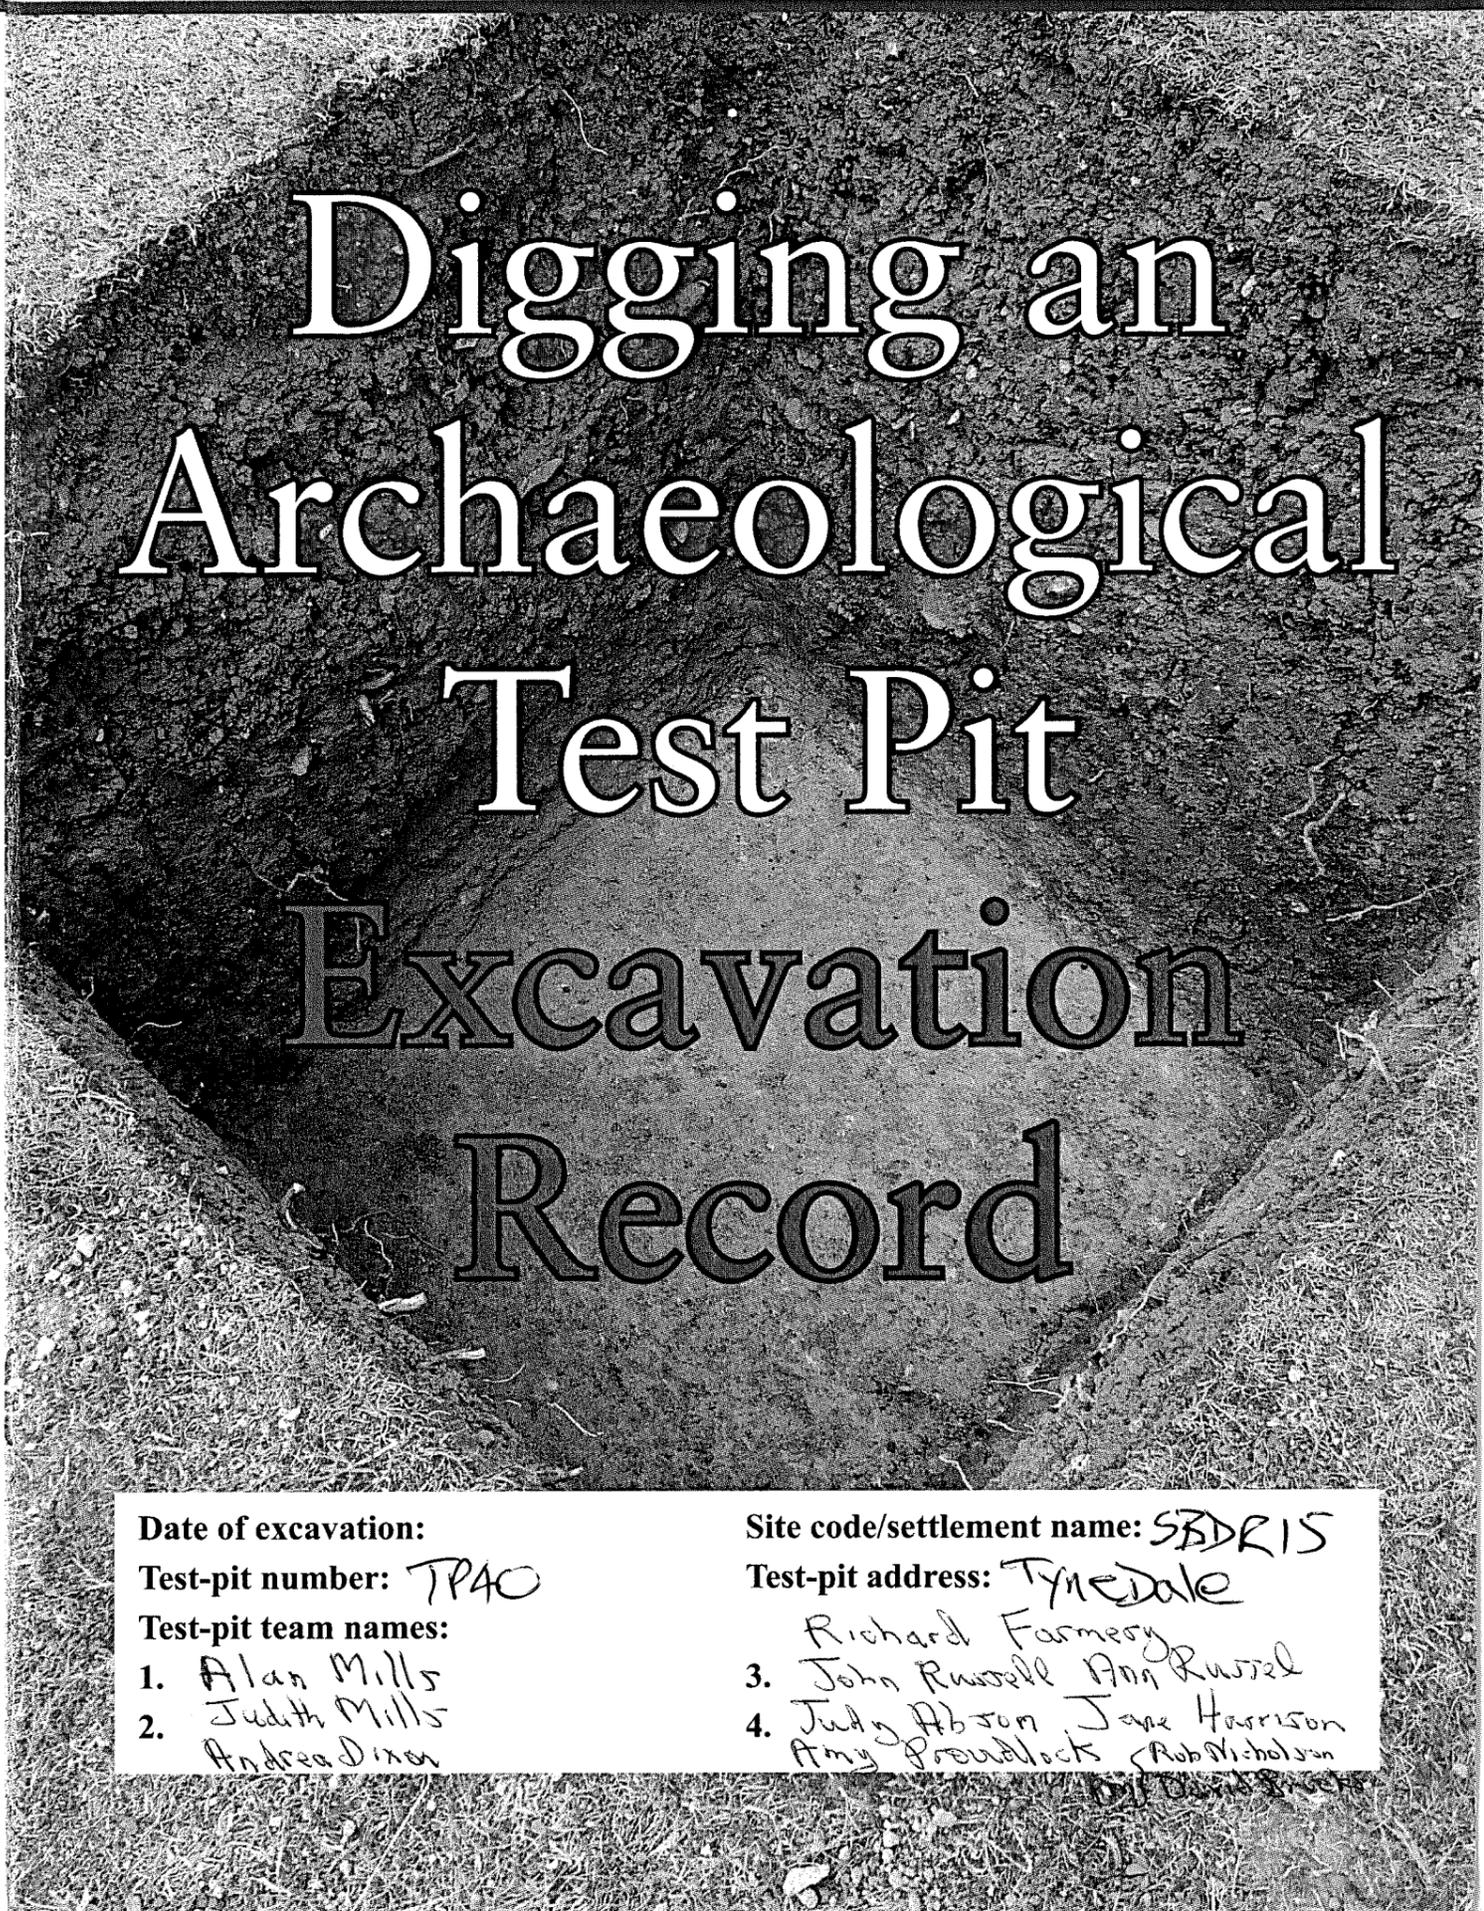

Summary of day 1 Date: 10/4/15

Start 8.15am; warm, sunny day. Andrea Dixon, Richard Farmery, Jane Harrison arrived 9am followed a little later by Anne John Russell. Judith Mills arrived to take the GPS reading then went on to leave house before returning around 11am to help with the test pit.

The dig went well; a wide range of finds was recovered. Of note was the possible cobbled surface at context 5 although the stoney nature of the lower contexts perhaps indicates against a oven made surface. The large amount of lime mortar and possible pieces of roof tile might suggest the presence of a nearby demolished building. One piece of medieval pottery was recovered from context 6, below what might be a surface. Contexts 3-5 were quite disturbed with 19th/20th finds down to 5 and 17th? green glaze red earthen ware (1) in context 3. Digging finished when the natural was encountered at 70cm; finished 5pm after a long tiring day.

1. Make a measured, labelled plan of the unexcavated surface the test pit, showing where it is in relation to features such as houses, boundaries, roads, walls etc which are marked on your Ordnance Survey map. Include lines showing the exact distances from your test pit to permanently identifiable points nearby such as buildings or field corners. Show your test pit as a square with the corners numbered 1-4, to correlate with the numbers on each context plan in the **Context Record Sheets** in this **Record Booklet**.

2. Draw an arrow here pointing in the direction of North on your map:

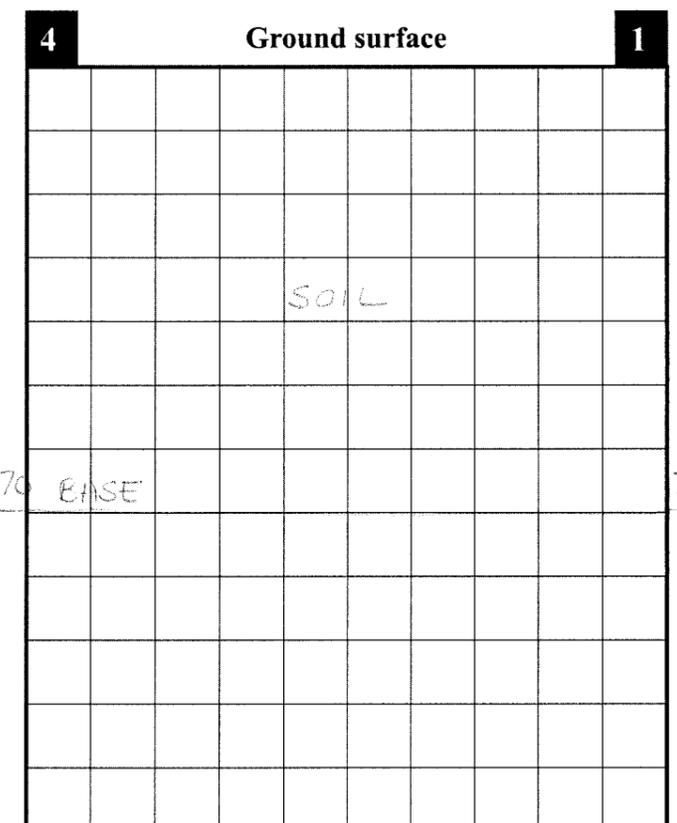

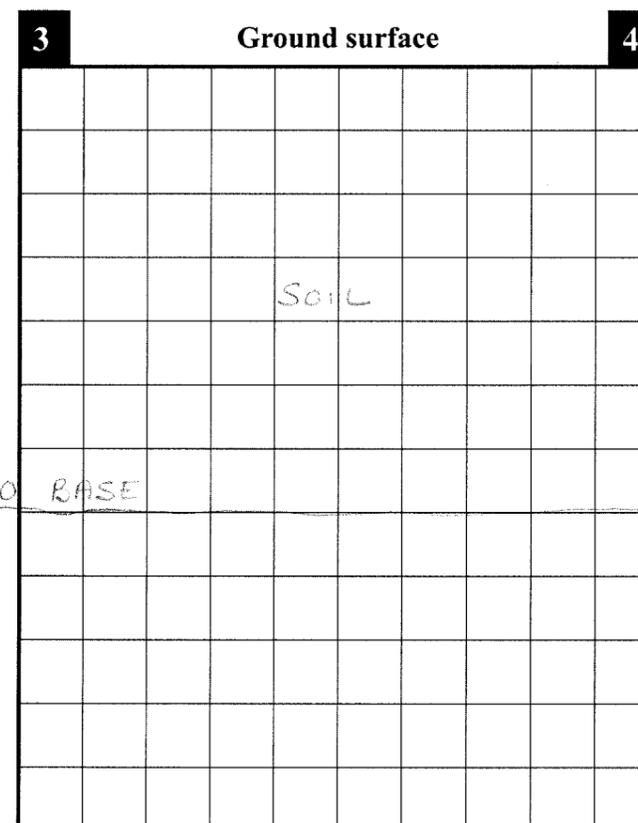

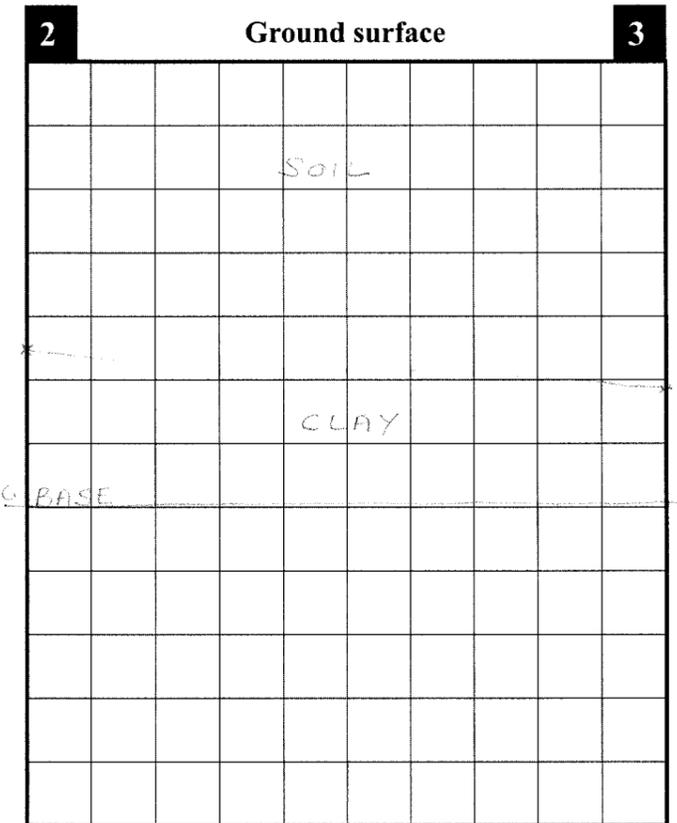

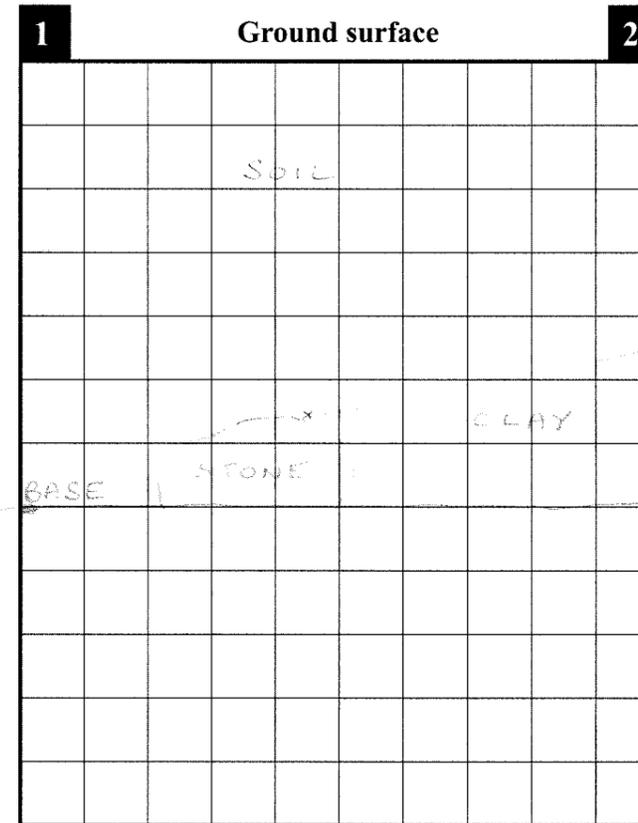

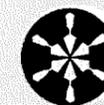

3. Describe where your test pit is, adding any notes which help explain this to someone who doesn't know your site:

Tynedale back garden - highest area on top lawn.

## FINAL Context Record Sheet

Site code: **SBDR15** Test Pit number: **40** Context number: **8**

Context recorded by: **Jane Harrison**

1. What depth is the surface of the top of this context at the four corners of your test pit (numbered in black boxes below)?

1 **70** 2 **70** 3 **70** 4 **70**

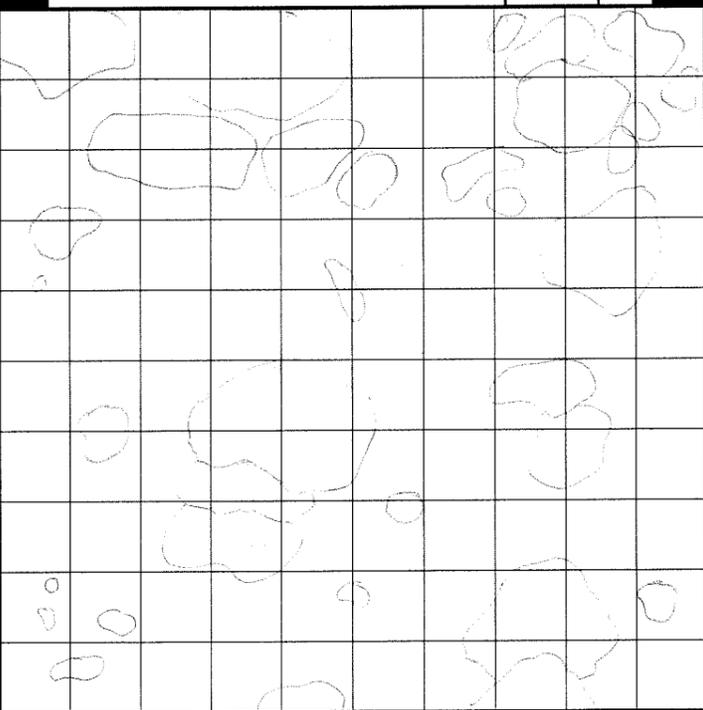

2. Make a measured, labelled plan of this context in the gridded square below (1 cm on paper = 10 cm in pit)

3. Draw an arrow here pointing in the direction of North on your plan:

**1** Final (unexcavated) context plan

**2**

**4** **3**

4. Describe what you've drawn on the plan, adding any notes which help explain what you have shown on your plan:

Stones sitting on glacial till
